

48V-SOLAR-KIT-40/180WP

48Vdc solar kit for red medium intensity obstafash 48Vdc

P/N : 113656

Key Points

Advantages

- Initial capacity of the battery with at least 6 days of autonomy which optimize the lifetime of the battery and minimize the maintenance cost to none
- our regulator controls the light for night only operation and protects the battery against overcharges and deep discharges
- The exact size of our solar panel and battery capacity depend on latitude/longitude

Mechanical Characteristics

Attachment

2 brackets for vertical or horizontal leg
